

Customary Measurement Foldable

By Laura Candler

The Customary Measurement Foldable is a three-flap foldable that students can use to take notes when learning about customary measurement. Please note that it's aligned with Common Core Standards for 4th and 5th grade, and the CCSS standards use the term "mass" and "weight" interchangeably in elementary school. I've included two variations of the pattern so you can choose the term you prefer to use with your students.

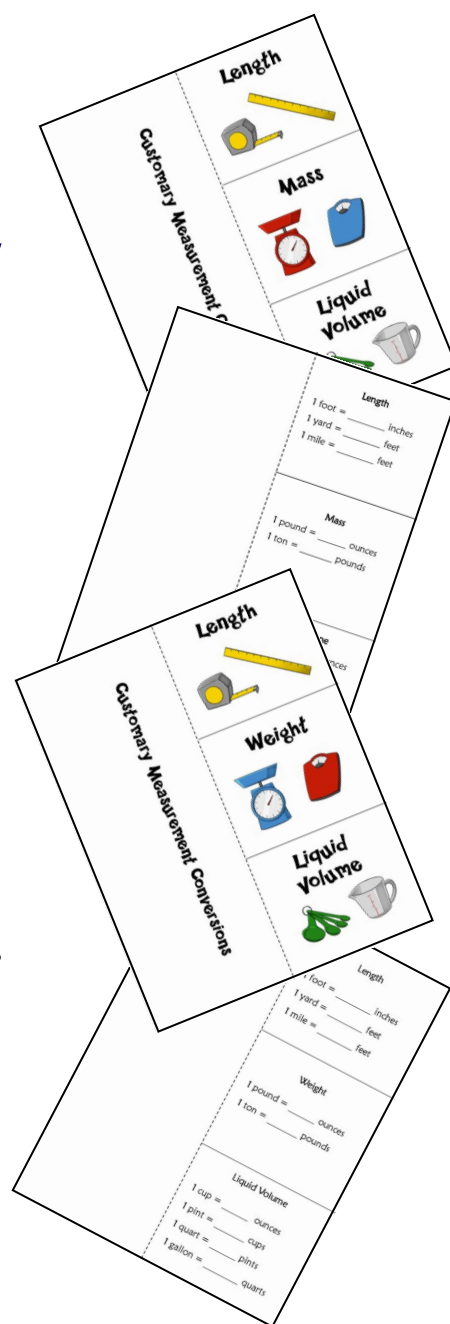

To create the foldable, print the two pages back to back. Fold in half on the vertical dotted line and cut the solid lines to form flaps. Students can lift up each flap and fill in the basic conversion units during your lesson. Great for math test prep and review!

This foldable is a free sample from my Customary Measurement Conversions Power Pack. If you like it, please take a look at the entire CCSS aligned teaching resource. You might also be interested in Gallon Robot to the Rescue. Both can be found in my TpT store.

Common Core Alignment

The Customary Measurement Foldable is aligned with the parts of the 4th and 5th Grade Common Core Operations Measurement and Data Standards below:

4.MD.1 Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec.

5.MD.1 Convert among different-sized standard measurement units within a given measurement system .

Even though the foldable is not specifically aligned with standards for middle school students, it will come in handy if they are having trouble remembering their basic units of measurement.

Artwork Credits

The clipart, borders, and frames in my ebooks come from a variety of sources. If you like the artwork and design elements you see in my materials, visit the stores of these clipart sellers.
